

All Scholars Achieving Greatly

Every diverse learner is capable of greatness. We've created innovative programming to ensure scholars reach their most rigorous outcomes.

Response to Intervention: Integrated Academic and Behavioral Support

These programs support all scholars, with or without IEPs, in growing academically and behaviorally. We adapt these to the needs of the scholar, individualizing our support.

REACH/Explorers: Developmental Math and Literacy Programming

This program is for scholars with IEPs who need more time working on developmental math or literacy. Schedules are individualized so every scholar is well prepared for his or her personal ambitious goals.

Essential Skills: Programming for Scholars with Significant Disabilities

This program promotes rigorous, developmentally appropriate instruction in math, reading, and transition, with meaningful inclusion throughout the day.

Travelers: Developmental Behavioral Programming

For scholars with FBAs and BIPs who need more support, we provide deeper behavioral intervention through this program, including check-in/check-out systems, incentive and tracking programs, and increased counseling.

Journey Program: Therapeutic Programming

This therapeutic program serves scholars with diagnosed behavioral and emotional needs. Scholars supplement academic classes with group therapy, social and emotional learning, and individual counseling. Scholars also receive transition programming through internships.

Opportunities Academy: Innovative Post-Secondary Programming

Nationally, there are few post-secondary options for scholars with significant disabilities. This year we are piloting our own post-secondary program as an equivalent to college. OA creates highly individualized PATH plans to ensure every scholar will achieve his or her highest level of independence in terms of living, career, and community access.

Intervention Leadership Fellowship

The Intervention Leadership Fellowship is a program designed to increase leadership capacity in our Intervention Teacher Teams

Fellows learn to:

- **Drive their vision for school wide intervention programming**
- **Develop teachers and staff in key mindsets and skills needed**
- **Collaborate with stakeholders to ensure alignment**

CA is committed to developing teachers and leaders committed to ensuring diverse learners receive an excellent education.
